

# **EXHIBIT 19**

**Subject:** proposed syntax for setting LACP bpdv rate.  
**From:** djhall@cisco.com ("Dan Hall \djhall")  
**Received(Date):** Tue, 18 Oct 2005 18:05:18 GMT

Hi,

Please take a look at this proposed new cli for LACP.  
The cli (pagp rate fast || normal) already exists for PAgP  
and I am extending this functionality to LACP.  
Proposed syntax for LACP:

~~djhall-6500(config-if)#lacp rate ?~~

fast Request LACP packets to be ingressed at the fast rate for this  
interface

normal Request LACP packets to be ingressed at the slow rate once the link  
is established

Thankyou,  
Dan Hall
